

The Chicago Hip Preservation Fellowship

At the
American Hip Institute

2019-2020 and 2020-2021

Focusing on Hip Arthroscopy and Joint Preservation

Fellows will be trained in all aspects of hip preservation surgery, and will gain a unique foundation in complex hip arthroscopy. Training will focus heavily on minimally-invasive techniques for treatment of labral tears, FAI, subspine and ischiofemoral impingement, dysplasia, and microinstability.

Comprehensive surgical hip skills include:

- Arthroscopic complex labral repair
- Circumferential labral reconstruction
- 3D planning and correction of FAI
- Capsular plication and reconstruction
- Ligamentum teres reconstruction
- Osteochondral management (microfracture, subchondroplasty, osteoarticular allograft)
- Endoscopic gluteus medius repair
- Endoscopic hamstring repair

Also included are peri-acetabular osteotomy, Birmingham hip resurfacing, and hip arthroplasty (direct anterior, posterior, and Mako robotic-assisted).

This highly specialized fellowship prepares trainees for a focused niche practice in Hip Preservation. Fellows with academic interests benefit from the strong research program, based in a collaborative, learning environment. The fellowship is ideally suited for trainees graduating from a sports medicine fellowship who wish to obtain further training in a second fellowship. However, application is also open to graduating residents. Salary up to \$80k annually.

Application

PLEASE SEND COVER LETTER, CV, AND THREE LETTERS OF RECOMMENDATION TO BENJAMIN G. DOMB, M.D.
