NYU Hospital for Joint Diseases Sports Medicine Fellowship Program

Orthopaedic Sports Medicine Fellowship (1 Newly Available Position/Unexpected Vacancy for the 2017-2018 Training Year)

NYU Langone Hospital for Joint Diseases Sports Medicine Fellowship Program offers a one-year fellowship fully accredited by the ACGME. Fellows in the NYU Langone Hospital for Joint Diseases Sports Medicine Fellowship Program are important members of the Sports Medicine Division, which is dedicated to the care of patients with athletic injuries of both the upper and lower extremities. Fellows can expect three-month rotation blocks under the supervision of the following faculty members: Orrin Sherman, MD, Andrew Feldman, MD, Eric Strauss, MD, Andrew Rokito, MD, Robert Meislin, MD, Thomas Youm, MD, Laith Jazrawi, MD, Michael Alaia, MD, and Guillem Gonzalez-Lomas, MD.

Fellows work primarily at two locations: the world-renowned specialty orthopaedic hospital, the Hospital for Joint Diseases, located at 17th Street and Second Avenue and our brand new NYU Langone Center for Musculoskeletal Care (CMC), which houses outpatient offices, radiology services, physical therapy services and our Ambulatory Surgery Center. The outpatient surgery center located at 38th Street and 1st Avenue has 6 fully staffed OR’s and an 18-bed PACU. A Sports Fellow’s daily schedule revolves around the schedule for the operating rooms, practice offices, conferences, and research time. Fellows perform common procedures like multi-ligament knee surgeries, shoulder instability/rotator cuff surgeries, elbow reconstruction/arthroscopy and ankle reconstruction and arthroscopy. Fellows will also perform complex procedures such as cartilage reconstruction procedures and osteotomies around knee, as well as open and arthroscopic Latarjet and capsular reconstruction. A large component of the fellowship includes hip arthroscopy and advanced hip reconstruction procedures. Educational enrichment is an important aspect of the Sports Fellowship. Fellows can expect to attend two didactic sports medicine conferences per week. Other conferences include a journal club on Tuesdays, a research meeting on Thursdays, grand rounds on Wednesdays, and a quarterly M&M conference. A skills lab at the Hospital for Joint Diseases is used to provide further cadaveric training. Additional responsibilities include sports game coverage for both the New York University and Long Island University Division 1 athletic programs. Fellows are responsible for the completion of three research projects during their fellowship.

Interested applicants please send the following documents:

- Updated Curriculum Vitae
- (2) Letters of Recommendation
- Copy of Medical School Diploma
